FROM THE PRINCIPAL'S PEN

Writing is the painting of the voice.

It has been my experience of finding words as effective medium for painting pictures as colours are and just as beautiful. Contrary to what people believe, written form in any language is just as universal and beautiful as a scenic painting. Starting early grooms the artist in young minds and hearts. This e magazine is that channel of creativity that carries the voices of the young writers of EOIS, Moscow and fountain the flow into breathtaking works of art. The world of Art waiting at the end of the road beckons all the budding artists with an indulgent mind and generous heart. I hope we can find it within us to be myopic to the faults and focus on the freshness of the written pieces. Enjoy your journey through the garden of creativity that has the brilliance of the sun on the early morning dew and the fertility of mother earth.

Good Luck and Happy Reading!

HUMAN ACTIVITIES AND GLOBAL WARMING

Contributed by
Satish Chandra Jha
PGT PHYSICS

Last year the Nobel Prize in Physics was awarded to Syukuro Manabe and Klaus Hasselmann "for the physical modelling of Earth's climate, quantifying variability and reliably predicting global warming" and the other half to Giorgio Parisi "for the discovery of the interplay of disorder and fluctuations in physical systems from atomic to planetary scales." A moment's thought must be spared for the pertinence of the theme to the current scenario. Human activities lead to Air Pollution and which in turn paves the way for Global warming. The presence of compounds in the atmosphere that are damaging to human and other living beings' health, or that damage the climate or materials, is referred to as air pollution. Gases such as ammonia, carbon monoxide, Sulphur dioxide, nitrous oxides, methane, carbon dioxide, and chlorofluorocarbons particles and living molecules are all examples of air pollution. Air pollution can cause diseases, allergies, and even death in humans, it can also harm other living species including animals and food crops, as well as harm the natural environment such as climate change, ozone depletion, and habitat destruction. Air pollution can be caused by both human activities and natural phenomena. One natural phenomenon is Green House Effect. Humans have reproduced the Green House effect through artificial Green Houses. A greenhouse is a glass structure that is used to nurture plants and grow green plants in cold regions. The greenhouse's plants and air are warmed by the sun's rays. The heat trapped inside the glass structure, cannot escape, warming the greenhouse, which is necessary for plant growth. The same is true of the earth's atmosphere. In a way it is a natural Green House. The sun heats the earth's atmosphere during the day. Heat is radiated back into the atmosphere as the earth cools at night. The heat is absorbed by the greenhouse gases in the earth's atmosphere throughout this process. This is what keeps the earth's surface warm, and what allows living things to survive on the planet. However, the earth's temperature has risen significantly as a result of higher amounts of greenhouse gases.

The gases that absorb infrared heat radiations and cause the greenhouse effect are known as greenhouse gases. Carbon dioxide and chlorofluorocarbons, Factories, autos, deforestation, and other sources of greenhouse gases are key contributors. The amount of these gases in the atmosphere increases as the number of factories and automobiles grows. The greenhouse gases never allow radiation to escape from the earth, raising the earth's surface temperature. As a result, global warming occurs. It is also enhancing Depletion of Ozone Layer. The ozone layer shields the earth from the sun's deadly UV rays. It can be found in the stratosphere's higher reaches. The ozone layer's depletion allows damaging UV radiation to reach the

earth's surface, potentially causing skin cancer and radically altering the climate. The accumulation of natural greenhouse gases such as chlorofluorocarbons, carbon dioxide, and methane, among others, is the primary cause of this occurrence. Smog and Air Pollution having mixture of smoke and fog creates smog. It can be caused by both natural and man-made factors. Smog is caused by the accumulation of additional greenhouse gases, such as Nitrogen and Sulphur oxides, in the atmosphere. Most of the world's water bodies have become acidic as the total amount of greenhouse gases in the air has increased. Acid rain is formed when greenhouse gases combine with precipitation. Man-made causes are of Global warming are higher levels of Deforestation , transportation and use of vehicles ,development of new cities , Combustion of fossil fuels, overpopulation , Carbon dioxide, which is influenced by expanding populations, is also a great cause. Deforestation alters the emission of aerosols and other chemical compounds, which impact clouds and wind patterns, causing precipitation levels to fluctuate.

Emissions of Chlorofluorocarbons also we all know that human-made causes have very strong tendencies toward growing global surface temperatures in today's situation of successive climate imbalance and challenges of global warming. Commercialization and greater usage of technical appliances such as air conditioners and freezers having CFC used in compressor are other elements that contribute to the reasons. The ozone layer in the atmosphere is in charge of shielding the earth's temperature from the sun's harmful UV rays. Such methods have resulted in an extra layer of CFCs (chlorofluorocarbons) in the air, reducing the ozone layer's intensity. Global warming has a wide range of societal, economic, and health consequences. It has the potential to create a great deal of harm if it continues in the same manner as it is currently. It will lead to rise in temperature leading to ice melt, Ecological Risks, threat to marine life, loss of settlements, health factors, flooding in low-altitude regions.

Now it's the threshold situation where we have to take measures to decrease all emissions of greenhouse gases and minimize greenhouse effect to stop further growth of Global warming and save our Ecosystem on Earth.

WHAT EDUCATION FAILS TO TEACH US!

Contributed by
Amit Gupta
PGT (Math)

Education is a powerful instrument for the transformation of social, economic, cultural and political conditions of a nation. It is also an effective instrument for making the masses to be more effective citizens, family members and leaders. This article is an attempt to know about the practical aspects of the Education. The aim of Education is the creation of a complete human being manifesting all the potentials. The education is a unique investment in the present and future. The children are the greatest asset of the world and shaping them into good human beings should be the main objective of schooling. Today, students are in need of such things that are needed in the day to day life but schools are providing the orthodox type of teaching. The rigid structure, a more rigid syllabus, water tight Examination System and astronomical scores define Education. Where is the room for the physical, mental and emotional capacities of the child?

One needs to move away from the stereotype system of Education that has ruled the Generations before us. It has to be revamped, redesigned and redefined to suit present day needs and prepare students for a better tomorrow.

But what do we have here in the name of education?

School in silos:

Now day schools are like silos. Silos are the usually large cylindrical structure, used for storing grains, grass or the winter food for the farm animals. At present the schools are working exactly on the principle of silos. How long are we waiting to use the Bernoulli's principle? How many times we have used Pythagoras Theorem to find out the hypotenuse of the double cheese pizza? I am still waiting to see the Benzene ring structure with my naked eyes. We are still want to meet that contractor who engaged 5 men and 3 women for a work and after 6 days he changed labour and now he wants to find out if we want to finish the said work within 2 days then how many men and women should be engaged in this job? Sometimes I feel like honouring the person who addressed Mathematics and said "Dear math, please grow up and solve your own problems, I am tired of solving them for you". I think that the word "studying" is derived from the word "students dying". If you also have such views

about education, then I think we should discuss various aspects of present scenario of education.

Need of skill based education as conclusion:

The present education system must be revamped and reoriented with the knowledge, skills and Management of emotions and must suit the new trends that are coming into the society continuously. Even after leaving the school, a child should be motivated and inspired in his mind, to read, to know more and the curiosity must retain in him. Such and child only can be called truly educated. Education is a life-long process. A child spends his/ her valuable twelve years of his / her life in other words we can say they spend 20% life span of their lives in schooling, this experience and exposure must enable them ennoble and enrich himself in future.

The need of the hour is to develop a student with the ability of critical thinking, decision making, managing with emotions and usable skills which help an individual in tackling his / her day to day problem. Skill based education system used with the ethics and societal etiquettes can cultivate our student into a worthy citizen rather than raising a burdensome entity evolved from silos education system. Schooling is only the beginning of the learning. An individual should feel answerable to his conscience always irrespective of whether he or she is being watched by others or not. He or she should do his duties without fails and keep a check on his/ her action. He or she should be able to discriminate between good and bad, the moral and immoral, and feel himself to be a part of the whole, the society. If we achieve these targets we can be sure building a healthy and vibrant society.

The skill based and ability to use the available resources by the sustaining them without learning the ecosystem can only be possible, if our educationist sociologist and policy makers sit together and brood upon the innovation in education system by boosting up the ideas of new education policy at root level in our schools.

WHY IS IT?

Shesha Prasad Nadupalli
PGT English

*Why is it that?
When things are rough
As they were meant to be
We don't try enough
Instead choose to flee!*

*Why is it that
The heart longs to forgive
The hand refuses to comply
the mind just as pensive
with forgiveness to try*

*Why is it that
The goodness we bury
The evil we nurture
Burdens we willingly carry
Only to mess up every future*

*Why is it that
We long for peace
But reluctant to practice
Seek a lot of solace
But make a loving embrace scarce?*

*Let every mind instead
Water the fountain of love
Bring to life every feeling dead
Nurture being on every bough.*

WHY QUALMS ?

Pendurthi Rajkumari,

PRT.

*The sky has no qualms
about you
It shields you through out your life
In its realm
The sun has no qualms
about you
It donates its energy to you
as giving alms.*

*The moon has no qualms
about you
Its always cool with you
like the love of your moms.
The stars have no qualms
about you
They twinkle all the while for you
like the cheer group pom-poms.*

*The clouds have no qualms
about you
They shower their choicest blessings on you
to sing like psalms.
When the creator of the whole universe
has no qualms about you
Why do you have qualms about you and a few.*

AN OPEN LETTER TO ALL CHILDREN.

Karuna Varma
PRT

Dear children,

Small or big, you all are very dear to me, because you are the best creation of the almighty God. We teachers teach you sometimes the meaning of life, but your mere presence and your smile teaches us what life is worth for. At the same time it is also important, that you should know the worth of your own life. I will not preach much but request you all, the future citizens, to spread love, brotherhood and integration towards each other and everyone in the society, irrespective of their behavior, situation or time and If even a single person or living being is happy because of you the purpose of your life will be achieved. Please allow me to share a story with you all.

Long ago a band of musicians made their living by playing beautiful tunes on band. But because winters were approaching their attendance was falling day by day. One day only one ticket was sold and they were in dilemma to play or not to play. One musician said to another I see no reason for performing tonight with only one person. Another musician added, you are right, no one can expect us to keep playing our best for so few and that too in such a bad weather.

The fourth musician had been sitting silently. And finally he spoke we should continue to give our best job at all times because God is always looking at us. And they played beautifully that night. When the show was over, they got the invitation to play the band next day in king's palace.

Because the only audience they have that night was the king

Likewise do your best all the time because every one of us has a king within ourselves so each and every one of us is important. And when we serve others with a positive attitude that every person deserves the best we can give. When we do so, we do not honor an individual, we honor the divinity in every one. Think over it and you will make this world a beautiful place to live, for yourself and for others too.

With a lot of blessings and love

BE CONFIDENT

*Mrs. Geetha Srinivasan
PRT*

Self Confidence is a super power, once you start to believe in yourself, magic starts happening..... a famous quote

What does self-confidence mean? It's a feeling of trust in one's abilities, qualities and judgments.

Actually self-confidence is an attitude about your skills and abilities.

In order to develop self-confidence, you must first love yourself. Once this settles in your mind you will not have the fear of doubt – which is the main drawback of self-confidence. When this doubt is overcome you can speak boldly, think smartly and act briskly.

Here are five simple tips to boost your self-confidence-

- Always be in the company of positive minded people. This will enhance your capacity to think positively.*
- Speak well about you; never say about your shortcomings. Remember no one is perfect in this world.*
- Set goals for your life and act on it. Strive hard for your goal. When you achieve this set target you are sure to gain your self-confidence.*
- Work on to improve your personality. Dress up smartly, speak slowly and clearly. Think before speaking in public. Small things but work on to boost your self-confidence.*
- Last but not the least, come forward and use the opportunities with full enthusiasm. Always keep in mind, opportunity knocks at your door rarely. Grab it and become a self-confident person in your life.*

INCULCATING HEALTHY LIFESTYLE IN SCHOOL

Dr (Mrs) VINITA SINHA

The responsibility of teaching students on how to maintain a healthy lifestyle does not solely depend on parents. Teachers play an equally important role.

I believe that schools should strive for a balance between helping students get good education and encourage them to become confident and competent members of society. The best way to achieve this is by focusing on developing life skills, adopting a healthier lifestyle right from a tender age, in short, creating a health conscious environment. This would help children in achieving good marks, better memory and longer attention span. Apart from education, emphasis must be given on shouldering responsibilities like cleaning their space (classrooms), toilets. Having lunch together and cleaning it after finishing must be followed as a classroom ritual, which would involve each member of the class. I know pandemic (Covid 19) has changed a lot of things in our lives but never the less, we still can start all over again just like ants never fail to carry their food unitedly.

A healthy school community involves ALL. Children who attend a healthy school can make informed healthy decisions that affect their own lives and lives of their families. A conducive environment for the children to grow and flourish has to be maintained by both parents and teachers. Inculcating healthy behaviour and activities in school children must be a priority and not an afterthought.

'LET'S THRIVE TOGETHER'

*Adwait Matkar
Class V*

*Tree gives us the cool breezes,
On the poles, the world freezes.
Those mountains could be as tall as Everest,
If you want to climb them, you shouldn't rest.*

*Animals are in many species,
With each of them doing their own duties.
Sheep are grazers,
But goats are browsers.
A huge tree grows from a tiny seed,
Air, water, warmth and sunlight is all that it needs.*

*Rivers form when glaciers melt,
A milky scenario is felt.
The ocean is like a vast bed,
The life in it should never be dead.
A rainbow has seven shades,
Its beauty never ever fades.
Birds help to disperse the seed,
Which is a very vital need.*

*All these things help to balance the nature,
Its conservation is essential for all our creatures.
Nature helps us to survive,
We should also help it thrive.*

PEACE

Suryansh Sachdeva
Class IX

*Since the day of our birth,
We have hoped for peace on earth.
You can help, by doing your part,
We know you can because you are smart.*

*For peace to happen, we must not fight,
Help each other and be polite
When there's a problem, let's just talk,
Sometimes peace just needs a walk.*

*All you need is to spread a word,
Get some help from your dog or bird.
Peace is something you will find,
Start with yourself and be very kind.*

A DONKEY'S TALE OF WOE

Arnav Kumar

Class-12

My master is a good human being; he gives me freshly rotten hay. After working for more than half a day, here I am, just to get 5 hours sleep and repeat everything tomorrow. Today, while carrying clothes which are almost 2 times heavier than I myself am, I heard a boy yell at his friend "you donkey!!!", how great that boy must have been, working endlessly for more than half a day, lifting infinitely heavy objects, getting scolded by his master for every move he makes, but still satisfies himself with freshly rotten hay. I might not be as athletic as my unique cousin horse, but I don't like rich people wasting their hard earned money just to see which one of my cousins is the fastest on field, but I hold a feud against none. Anyone who gives a good meal at the end of the day, is my master, and for my master I will work tirelessly without any other demands. Why my impression on this land is so bad, no one knows.

I love it when my name is used as an adjective, but I don't like it when my name is used to describe something dumb or stupid, what have I done to earn such a status among these two legged creatures. Someone should be called a donkey if they listen to each and every command of their master and execute it to perfection. My fellow companion, the dog, who does not need any introduction to, also is very popular among humans, I wonder why? Is it because they demand a lot of fancy accessories, or need to be walked every day with their masters or the sounds they make at night and sometimes disturb my sleep as well, but aren't these some reasons to avoid someone? Then why do I find my companion in every second house? Well what is it to do with me but please don't get me wrong, I don't hold a feud against anyone.

Technology, a thing that animals don't associate themselves with, has changed my life in many ways. Tractors and other machines have taken over my work these days and require a lot of currency and petrol to satisfy themselves whereas I only require a little bit of hays and maybe barley and wheat on good days, but again, I hold a feud against none, not even a tractor.

I am a donkey, and I am owned by the poorest of men and live in the poorest of conditions, but this is everything for me, this is my life. Who am I to change the perception of these humans about my species? Why should I? I am very happy because my master is a good human being; he gives me freshly rotten hay.

THE BIRD AND THE TREE

Rachit Verma
Class X

A blue and beautiful bird lands on a tree. The Bird is beyond tired and carelessly uses the tree to rest. The Bird thanks the Tree for allowing it to rest. Hours pass and the bird informs the tree that it will return the next day. Both the bird and the tree are excited to meet each other the next day. The Bird returns and rests on the tree again. This time, the two share stories back and forth. The bird has a cocky attitude and is unappreciative of the things it has during all the stories it shares. The Tree on the other hand is much more compassionate and comes off as very caring and appreciative of the people around it. Weeks and Months pass and their friendship grows stronger and stronger. The bird is seen resting on the tree at almost all times and the tree appreciates the bird's company. At one point, the bird even brings its friends to meet the tree. The Tree grows sweet fruits for the bird to feast on and The Bird drops a couple of seeds around the tree to grow new friends. One windy day in winter however, they get into an argument. The bird complains that it's the responsibility of the Tree to keep it warm and safe from the cold winds. The Tree disagrees and criticizes the Bird for expecting too much.

"I cannot grow leaves in the winter, how am I supposed to shield you?"

"I don't know, that's your problem. It's your responsibility to keep me warm. Besides, I haven't eaten any of your fruits since last month." said the Bird. The Tree, upon hearing this, was enraged.

"How can I grow fruits without leaves?"

"Like I said, that's your problem."

The Tree and the Bird shortly after, stop meeting each other and go their own separate ways. Two years pass since the argument and the bird randomly flies by the area it once used to visit everyday. The bird tries to meet the Tree but to its horror, it's been uprooted and chopped up into tiny logs. In disbelief, the bird flies away. The bird could not rest the following week. It was shocked. Knowing that the last time the

Bird and the Tree spoke, all they did was fight. The bird couldn't comprehend that one can lose someone in an instant until now. The bird wondered, if the argument even mattered. It realized that it was in the wrong for expecting too much from the Tree.

"The tree couldn't grow anything during winter, why did I not only expect him to grow fruits and leaves but also ridicule it for something it couldn't control?"

"The tree didn't even have legs to come and meet me, or else it would have."

"Why did I let all this happen, why did I let a petty argument end my friendship." The bird thought to itself in dismay.

Alas, all was said and done and the tree was gone forever, and ever. The people around us matter more than we think they do. We must cherish and care for them and spend time with them as much as we can. Arguments are bound to happen and they aren't the problem, the problem is ending a bond over an argument.

WILLAM IN THE WOODS

Devansh Paryani
Class IV

Once a boy was born at night in the
woods only he and his mother lived
there his mother taught him and
played with him.

His mother did not let him out of
the woods soon he believed he and
his mother were the only humans
alive. One cold night he heard
someone whistling outside his cabin
he peaked outside the window to see a
man in a suit he woke his mother up
and told her about the man she went
outside and when she saw him she was
shocked she called Willam she told
him that he was Willam's father he
lived in the city for work and they
went to the city together.

THANK YOU TEACHER

KAVISH GUPTA
Class IV

When this pandemic began, teachers were given little notice to shift very quickly to distance learning or e-learning, sometimes with little or no training. In many cases, they had 48 hours or a weekend to reinvent lessons for an already planned curriculum, learn new technologies, find non-technological solutions to student learning, and figure out how to keep students engaged.

But teachers are struggling like the rest of us, they have to balance home and work and how to do their life's work from afar while simultaneously caring for students, grieving losses, and facing major disparities as they do their jobs. How do we even begin to appreciate teachers in this current situation? We've seen celebrity tweets and photos and blogs that we must pay teachers more, maybe even a million dollars a year. While it's unlikely in practice, the sentiment is right about the value of skilled professional educators.

If you are a parent, a student, a community member, or a school board member, one of the best ways to appreciate teachers is to not forget what this experience has been like. More than a year from now, whether we've resumed "normal" school again or not, let's put this greater understanding of the value of teachers to work by rethinking the policies and practices that affect educators.

THE ALTITUDE OF LIFE

Kashika Bhojwani
Class X

Life, what is life??

For us a race, if we don't run we are left behind. Reality is an illusion. Even life is not all roses. It is never truly what it happens to be. Failure comes in life but we should learn from it and move forward. I know it easier said than done, but we need to do it to keep moving forward. People will always criticize you and you will break down, but remember, only people who ignore the criticism and focus on their goals rise in life. Never use 'but' for an answer. It only reflects that you are not confident enough to deal with the situation. Problems will always be there. People will always be there to pull you back and keep you away from succeeding and there lies the difference, in that way you deal with them. Your positive attitude will make you stronger while your negative attitude will make you weaker. Excellency is not a skill, it is a positive attitude.

The problem in today's world is competition fueled with rage. You try your level best, fail and get depressed. Why should anyone be depressed? Just show some guts and move forth. Only you can decide your future and make it bright, no one else is going to do that for you.

There will be many events in life you have not thought of, which will change the direction of your life. Never assume that the direction is wrong, but think you have gained it from your own deeds. Things turn out best for those people who make it best out of their situation. You can achieve whatever you want in life, but never get misled. Be what you want to be in life, not what others want you to be. Always take things positively in life because you can never have a positive life with a negative mind. Don't compare yourself with anyone in this world, by doing so, you are insulting yourself. Every person is unique in their own ways.

MONEY RULES THE WORLD

By Aarav Parin

Class 10

Money governs the world, as they say. This is a mutual thought that is backed up by a plethora of epitomes in today's society. That would include personalities like Elon Musk, Jeff Bezos, Bill Gates, Warren Buffett and many more. It is incredible that trillions of transactions taking place every second are affecting our lives in distinctive manners!

Money has been the pros and cons to situation of the modern humanity. Since the last few decades, majority of the countries have seen advancement in their conditions due to presence of a growing economy but on the other hand, vast amount of population has faced atrocity on the basis of poverty and discrimination.

Greed is a common sin of many now and in the past. There are many anecdotes that paint greediness as one of the most horrible liabilities one can have that changes the way with which person interacts with and views the world around them, making it seem as if their lust for money is the only thing in realism that truly matters to them. This thinking process is what I believe to be a sensible one considering the competition we are seeing in this flourishing society.

Money is certainly precious but it is only the Tail of the coin. The other side is a gem: Your Personal Life! It is necessary for us to understand that Money does very much impact our lives in huge ways and that indirectly affects our ambience and relationships. So, it is always good to make money but don't take yourself for granted and don't involve yourself in this dreadful race, otherwise, you will forget yourself and the ones who are linked to you.

The best way to earn more is to make a proper planner of your life and set some goals to achieve it including your health and your loved ones.

Million-dollar you can chase in your life, but alas! You couldn't be able to enjoy it with ecstasy. SHE may not rule our minds all the time, but definitely does rule the world.

CHOCOLATES

Ismat Akter
Class VI

*Chocolates are yummy,
Some are bitter, some are creamy.
Everyone likes chocolates,
They come in many shapes,
They also come in different flavors like
vanilla white and grape green
strawberry pink or blue berry sheen
Some are white and brown,
For a penny or a crown
These sweets are all over the town.*

WHAT IF I COULD CREATE A NEW UNIVERSE

Yuvraj Kumar
Class VII

If I could re-create the universe, I would make some tiny people and create many forests and water bodies. I would teach them a language. Also teach them live in harmony and at peace with each other. Tell them how to save as well as save supplies. Help each other in need and not aim for greed. Land would belong to all and people would work collectively. And teach them not to pollute the resources. People could do anything they like except for harming the environment. Everyone would be really happy without any discrimination.

MY TRIP TO THE KONARK SUN TEMPLE

Anushka Soni
Class VI

It was long ago, on 26th January 2020 when I was 8 years old. I visited the beautiful, ancient Sun Temple in Bhubaneswar, Odisha. The answer to my extreme excitement was my first trip to a monument with my paternal grandparents!

We started from my grandparents house in a village, we sat in an auto and reached the railway station. We were in a bit of a hurry due to the amount of luggage but after sitting it was all calm and peaceful. It was fun on the train with my grandparents. After reaching the destination we went to a hotel and booked 3 rooms, rested and got ready.

At last, we were at the Konark Sun Temple. We also had a guide with us. The temple was devoted to Lord Surya (Sun) and in the ancient times it was used to see the time. Due to its dark colour, it is also known as 'Black Pagoda'. It's one of the seven wonders of India.

We roamed all around the temple and the guide told us about its history. We also took some photos from different angles. I truly would like to visit such places again with my family!

MOTHER

Vibhuti Juyal

Class VI

There's no love like a mothers.

A mother taught her child right from wrong,

A mother sat her child through the night for long.

A mother shares her love freely in her tender loving way.

A mother grows more beautiful to her child with every passing day.

A mother teaches her child to be confident and bold,

Mothers' special love towards her child is more valuable than silver and gold.

A mother is one of God's greatest gifts to you and me.

Her love will always remain in our heart forever and ever.

THE STORY OF PRINCESS KRISTA

Krista
Class II

Once upon a time there was a Princess named Krista. Princess Krista had a cat. She also liked to dance.

One day, at a dance party in the kingdom, a handsome Prince asked Princess Krista for a dance. But then an evil dragon appeared in the kingdom during the dance party. The Prince protected Princess Krista and helped her escape the kingdom.

The Prince sought help from the fairies. The fairies gave the Prince a sword and a shield to defeat the evil dragon.

The Prince and Princess Krista then returned to the kingdom, to fight and beat the evil dragon. When they arrived in the kingdom, they met a kind hearted dragon Stars-Jack the Black Dragon, who was willing to help the Prince and Princess Krista to defeat the evil dragon.

The Prince, Princess Krista, Stars-Jack and the Black Dragon fought together against the evil dragon and defeated him.

The Prince and Princess Krista married and lived happily ever after in the kingdom.

TRASH AS TREASURE

*Devashree Ashish Borode
Class II*

*We can use trash
to make something*

*We can make dolls
using bottles.*

*We can use cardboard
for making fancy dress costumes
and we can use boxes
to make a toy train.*

*We can use paper
to make a pizza*

*We can use all these things!
we call them trash
but we can make all beautiful things
let's have fun while making them
and see the magic
of what we did*

NATURE IS A BLESSING

Paarth Bhojwani,
Class III

*Do not pollute,
water and air.*

*Don't throw garbage,
Here and there.*

*Do not cut trees,
never and ever.*

*Search a solution,
stop pollution.*

*Say no to plastic,
be fantastic.*

*Plant more trees,
everywhere.*

*Let's go green,
to get our globe clean.*

SAVE TREES!

SAVE ENVIRONMENT!

SAVE NATURE!

OLD IS GOLD

Iva Jain
Class - III

*Few days back,
When my mom was cleaning.
She found an old toy of mine.
And told me – I used to play with it,
When I was nine,
Though I forgot about it now.
To get it back made me feel just wow,
I hold it always in my hand,
And I feel very grand.
Now I understand,
Why granny used to tell that “Old is gold”.*

Don't give up

DIVYANA GYANCHANDINI,
CLASS III

*When nothing is going your way
When things go wrong
Don't give up,*

*Life is full of happiness and tears,
Which everyone has to bear.
But if we don't fear the tears,*

*There is a song that will linger
forever in our ears,
Oh, hard times, don't come here.*

GAURI AND GYMNASTICS

Gauri Poddar

Class III

My name is Gauri. I came to Moscow in 2019, when I was five years old. My mother took me to the circus and I was amazed to see Russian girls doing gymnastics and acrobatics. I wanted to learn too. I asked my mother and she took me to a Russian gymnastic school near my house. I really liked it and I learned to do cart-wheels there.

But all good times came to an end when my gymnastic school closed down with the advent of COVID. When it reopened, it moved to a place that was quite far from my house. Then I joined another gymnastic school. This was an artistic gymnastic school. I learned to do gymnastics with the help of a ball and hula hoop in dance form. The school held its annual day in December during Christmas and I participated in the event. I got fourth prize in the competition. I also got many gifts from Russian Snegurochka. I really enjoyed the event.

I want to continue to learn gymnastics and become a National gymnastic player one day. May my dream that was born in Moscow come true?

TRADITIONAL INDIAN WEDDING

Contributed by
Advika Kumari

Class III

In our country weddings are held in big places like farmhouses, resorts etc. It is held with great love. There are many relatives who join these ceremonies. It is very enjoyable and there are a lot of things to eat and dance is the main part of this moment. It is a lot of fun. On this occasion the bride and groom get married. All the members enjoy it a lot.

Indian marriage is very fascinating and enjoyable. Here in the marriages all the relatives come. Many types of functions are done. Marriages are very good to watch here and all the members enjoy the marriage. On the day of the wedding, the bride will be in a very beautiful dress and there will be a section for kids such as if they want balloons and sweets etc... All the members wear new dresses and look nice.

On the day of the 'sangeet', relatives from both sides, sing & dance.

The Mehendi ceremony takes place one day before the wedding. Women design their hands and feet with mehendi.

On the morning of the wedding, the Haldi ceremony is held. In this tradition, both sides of the family spread a mixture of oil, water and turmeric over the skin and clothes of the bride and groom.

During the wedding ceremony, The Bride & Groom walk around the fire seven times. This ceremony is called 'Phere'.

The 'Mangalsutra' is a necklace with two gold pendants. The groom ties the necklace with three knots to signify a strong bond with the bride for years to come.

Traditionally, the bride will wear a 16-piece attire called 'Solah Shringar' which includes make up, jewelry, and clothes. At a traditional Hindu wedding, the groom will wear a 'Sherwani and Mojari', which is a type of shoe that is seen often in Mughal art. As for the guests, most women at the wedding will be wearing a Sari or a Lengha. The guests, as well as the bride and groom, generally dress in loud colors.

It was a great experience for me attending a Traditional Indian wedding.

WHEN MY PET TURNED INTO A HUMAN

DEV BINU
CLASS V

One gloomy morning, when I woke up, I felt that someone was sleeping next to me. I thought to myself – “Oh, it must be my pet dog Hammer!”

But then I saw that someone was sleeping next to me and it was neither my parents nor my dog!

I shouted – “Who are you!”

The stranger said – “Who do you think? I’m your pet Hammer of course!”

I said – “No you aren’t! Look at yourself!!”

The stranger said – “WHAT HAPPENED TO MY CUTE LITTLE PAWS!! AND WHY DO I HAVE SUCH WHITE SKIN!!”

I said – “Well, if you’re really my pet dog, would you mind if I interrogated you?”

The stranger said – “Go ahead!”

I said – “Okay, here comes the first question!”

“What’s my pet’s name?” I asked

He said – “Hammer of course!”

I was shocked that he knew!

“Okay you’re correct, let’s go ahead and the second question”- I said

“How’s my pet’s fur?”

“It’s Snow-White snow bright of course! Maybe that’s why I’m so white!” – he answered

“Hmm okay... Last question! What’s my pet’s favorite thing to do?”

He answered – “Go for walks of course!”

I just stood there in awe! THIS WAS ACTUALLY MY PET!

But then I saw my cute little hammy running towards me!

I looked for the human all around the house,

but I couldn’t find him. That’s when I realized that this was all a dream!

Thank you!

A SHORT STORY ON LONELINESS, WHEN I FELT ALONE AND WHAT DID I DO TO CHEER MYSELF UP?

Hrithik Raj
Class – V

We all know that “Loneliness” is a strong emotion. It can be defined as a distressing experience that occurs when a person feels isolated from others, feels that no one is beside him on whom he can count on, a feeling as if he exists alone in this wide world.

Now my dear friends, I am going to tell you about a certain time when I felt very lonely and isolated and what did I do to overcome loneliness in that situation.

It was during my last winter holiday to India. Suddenly, one morning, when I got up, I saw my parents dressing up to go to the doctor for my mom’s check-up as she was not keeping well for some time. I asked my Papa whether I could accompany them, to which he said “no”. Tears welled up my eyes at the thought that the whole day I would not see my mom with whom I am very much attached.

The common understanding of Loneliness is being alone. However, to tell you the truth my friends, we can feel lonely even when we are in a crowd or with someone. The same thing happened to me. After my parents left for the clinic, I was immersed in an emotional state of mind. I felt as though the whole world had collapsed around me. My cousin brothers, aunt and uncle tried to cheer me up, but to no effect. Later, after an hour my papa called me and comforted me saying that everything is fine with mom, and that I should calm down and enjoy my holidays with my cousin brothers. I gave a deep thought to my papa’s words and started getting grip over my emotions, over my loneliness.

I requested my Aunt to accompany me to the nearest temple where I could pray for my mom’s health. Then after praying in the temple, I gave alms to the poor people sitting outside the temple. I felt such an inner peace of mind that cannot be explained in words. The poor people all blessed me and said all good words to me and to my brothers. They wished me and my cousin brothers Good Health and Good Luck. On our way back home, I also bought some food and distributed it among the poor children. They were so happy to get them. I didn’t know that one can get so much happiness by helping others, especially the unfortunate ones. When I came back home, all my loneliness had vanished and I called my papa to tell him about what I did on that day. In the evening when my parents came back home, it was the best day of my life – I was so excited to see my parents back from the clinic hale and hearty. It was a tremendously good experience for me as to how we can change our loneliness into happiness by praying and helping the unfortunate ones.

GENERAL AMAZING FACTS

Compiled by
Prisha Shivhare
Class: IV

- India has the second highest population in the world.
- The Barbie doll's full name is Barbara Millicent Roberts, from Willows, Wisconsin. Her birthday is March 9, 1959, when she was first displayed at the New York Toy Fair.
- The tallest man ever recorded was American giant Robert Wadlow (1918–1940), who stood 8 feet 11 inches.
- The oldest-known living land animal is a tortoise named Jonathan, who is 187 years old. He was born in 1832 and has lived on the island of St. Helena in the Atlantic Ocean since 1882.
- Mosquitoes are the deadliest animal in the world: They kill more people than any other creature, due to the diseases they carry.
- The longest fingernails ever were over 28 feet in total. American Lee Redmond started growing them in 1979 and set the record in 2008. Sadly, she lost her nails in a car crash in 2009.

Amazing facts about Science

- The Eiffel tower can be 15 cm taller during the summer.
- 20% of earth's oxygen is produced by the Amazon rainforest.
- Hot water freezes faster than cold water.
- Humans have 206 bones. The human foot has 26 bones and the human hand had 54 bones.
- Babies have around 100 more bones than adults.

Amazing facts about Maths

- Plus [+] and Minus [-] sign symbols were used as early as 1557 A.D.
- Zero is the only number which can't be represented in Roman Numbers.
- There is only one number spelled with the same number of letter as itself that is number 4 [Four]
- 6 is the smallest perfect number, meaning it can be made by summing its divisors ($1+2+3=6$)

THE CORONA VIRUS

Anushka Soni
Class VI

*In the year 2019,
The naughty virus was born!
Its name was kept as Corona,
COVID – 19 in short.*

*In search of a true home
It travelled the world and visited every dome
People want it to leave the world,
But Corona just wants a home.*

*You just have to wear a mask,
Also some plastic gloves,
And wash your hands for 20 seconds,
To keep away the germs.*

*It is not so hard to do,
So give it some tries,
But keep it in your mind,
With dirty hands, never touch your nose, mouth or eyes*

*Standing a few meters away from your friends,
Won't break your friendship.
You still need to take precautions,
Because Corona has not gone yet!*

*Remember, we can't blame others,
It's all our mistake,
We didn't care about our nature.
Now, everyone has to wake up.*

THE STORY OF SPACE!

Saanvi Parin
Class V

It was a dark windy night, I had my dinner and went to sleep as soon as I stepped into my bed. Suddenly, I stepped into the world of space. It was obscure to me yet very exquisite. I went more to explore as I started taking another step a blaze of light whacked into my way. I saw a small alien. It proffered me a green stone. It also gave me a tiny piece of paper which told to use this stone sagiously. I went ahead and saw the nearest planet to the sun, which was mercury. I was bewildered but I thought to go with the flow, so I took my first step on Mercury and a glen of sunlight struck me. I thought that I was boiling so I continued. I went to Venus. I was flabbergasted to see such a planet. Far away I saw our earth I ran to it. I thought to call out all my bezzies, but I thought maybe next time. I thought let's move on I saw the solitary mars. But actually I was really excited and was in a scurry to see the largest planet the Jupiter. It was thousands times larger than me. I gave it a lucid look. Well let's continue it's getting late. I saw some shining rings, oh wow! The Saturn. It looked lovely. Next on was the Uranus. It looked like slight bluish. Last but not the least the Neptune. It was such a glee to be there. I really wanted to see the Pluto but maybe next time, some fun for next time too. Well a spaceship came I sat in it and went back to my home. It was a perfect jaunt. I got up and saw it was 9 am. I rushed up to brush and get ready. But I really felt tranquil at home. Our planet is more desperate than other planets yet really beautiful.

WEEKEND IN LONDON

Permata Aulia Putri

XII Commerce

On 10th and 11th march 2017, my family and I went to London for the weekend. Even though it was for a very short time, we had a lot of fun. We went to London by Iberia Airlines and when we arrived at the Heathrow Airport we had to get onto a train called Heathrow express, it is a rail link operating between London Heathrow Airport and London Paddington. Then we stayed at a nice and small hotel near the Big Ben Tower. It was very crowded with tourists in that area. The first place we went to was the iconic London's Big Ben Tower which is also located near the Tower Bridge. Tower bridge is considered to be London's most striking bridge and it became a famous place for tourists. The side road was filled with many people from different countries enjoying the pretty view of London. My sisters and I took many pictures with our camera. London is a very nice city to walk around and everyone there is very polite and well-mannered. Later went to Sherlock Holmes Museum which is located in the famous Baker Street. The outside of the museum looked just like a normal house in the streets of London, but when I went inside it was nothing like a normal house. It made me feel like I was in the movie

On the second day, we went to Platform 9¾ or also known as The Harry Potter Shop. This shop is located in London because the movie franchise was filmed there. We also bought some souvenirs from there, like mugs, scarfs, wands, etc. Around noon, we went to Madame Tussauds Museum, it was such a fun place! There were many statues of famous internet celebrities and important people. They all looked so real, it was as if I was actually meeting them in person. After a few hours spent in the museum, we went to Buckingham Palace and it is as expected, super crowded. Buckingham Palace is a London royal residence and the administrative headquarters of the monarch of the United Kingdom, it is located in the City of Westminster. We could only take pictures in front of the gate, because it is usually always closed. After that, we went to eat at a restaurant and went back to our hotel by underground. We didn't rent a car, so throughout the whole 2 days in London, we just used the Underground facilities. London has a high quality underground system and they even have public bathrooms in most of them. It was also easy to buy a ticket to use the underground, so it won't be a problem for tourists.

So, that was my "Weekend in London". I had so much fun in just a short period of time, visiting London is definitely an experience I will never forget!

CRYPTOCURRENCIES: THE FUTURE OR JUST A FAD?

Contributed by
Balakrishnan Ravi Jeethesh
XII Commerce (2022-23)

The term 'cryptocurrencies' has taken the world by storm in the past few years, which has left a lot of people in the dust. Not knowing what it is or how it even functions.

So today i want to provide answers to these common questions about cryptocurrencies

"A cryptocurrency is a digital currency that is decentralized and is in the blockchain", if we break down this basic definition of cryptocurrency we get a few questions

"What is a digital currency", "what is a block chain?" and "what do you mean by the term 'decentralized'?". These questions will all be explained in due time.

A "digital currency" is a intangible asset that is not tied to any real world item like how nowadays we have paper notes and before paper notes people used to buy and sell goods with coins that were made with precious metals. Digital currencies are completely stored and exchanged online especially via the internet. These currencies are stored in e-wallets (electronic wallet), they are just as useful as real world currencies and can be use to buy physical goods and services.they allow for instant transactions and are often the cheapest method for trading, yet even something as digital currencies can be susceptible to hacking and are VERY VOLATILE (volatile meaning that their value can rise and fall drastically in the matter of seconds) which makes digital currencies very risky. Now the terms 'block chain' and 'decentralized' are interrelated terms, the block chain is a distributed ledger that is shared with everyone, a blockchain is a chain of blocks where each block contains data regarding one transaction. This data is protected by a hash which is basically a very powerful password that is made up of a combination of numbers and letters, a new hash is made when there is a new transaction or whenever one block is tampered with, hashes or not the only thing that keeps the blockchain and crypto currencies secure the use of a decentralized network adds another layer of security. A decentralized network means that all the transactions are not overseen by one main authority but is in fact shared amongst all the users, (an example of said main authority is how all

the currency in India is regulated by the RBI) every time a user adds to the block chain by making a transaction he/she receives copy of the Block chain i.e if someone wants to tamper with the block chain they will have to tamper with everyone's copy of the block chain which is impossible considering the amount of users in the block chain.

A few examples of cryptocurrencies are bitcoins, Litecoin, dogecoin, Ethereum, terra, cardanno, etc. To buy cryptocurrencies one has to first register to a website that allows you to trade crypto such as binance.com, coinbase.com, eToro. After registering one has to open a e-wallet, this is the place where all your currencies will be stored, after completing these two steps you can freely trade cryptocurrencies.

With the world getting more integrated with technology day by day we are starting to see cryptocurrencies become more and more mainstream and might one day become the main form for payments,thus now is a good time to invest into the future.

ओणम केरल का त्योहार

नाम: अनंतकृष्णन

कक्षा: 8

ओणम केरल का एक प्रमुख त्योहार है। ओणम केरल का एक राष्ट्रीय पर्व भी है। ओणम का उत्सव सितम्बर में राजा महाबली के स्वागत में प्रति वर्ष आयोजित किया जाता है जो दस दिनों तक चलता है। ओणम में प्रत्येक घर के आँगन में फूलों की पंखुड़ियों से सुन्दर सुन्दर रंगोलिया (पूकलम) डाली जाती हैं। इस पूकलम का प्रारंभिक स्वरूप पहले (अ तम के दिन) तो छोटा होता है परन्तु हर रोज इसमें एक और वृत्त फूलों का बढ़ा दिया जाता है। इस तरह बढ़ते बढ़ते दसवें दिन (तिरुवोणम) यह पूकलम वृहत् आकार धारण कर लेता है। इस पूकलम के बीच त्रिककाकरप्पन (वामन अवतार में विष्णु) , राजा महाबली तथा उसके अंग रक्षकों की प्रतिष्ठा होती है जो कच्ची मिट्टी से बनायीं जाती है। ओणम में नोका दौड़ जैसे खेलों का आयोजन भी होता है। ओणम एक सम्पूर्णता से भरा हुआ त्योहार है जो सभी के घरों को खुशहाली से भर देता है। इस त्योहार में परिवार एक साथ मिलते हैं और समृद्धि के साथ मनाते हैं।

संदेश

अंशिका सिंह

कक्षा 10

हरियाली की छाती पर, ये सफेद बर्फ का साया है।

देखो भगवा फूलों का रंग, चहुँओर छाया है।

रूसी गदरायें यौवन पर, मानो उतर तिरंगा आया है।।

मैं जिस देश की माटी का संदेश सुनाने आई हूँ,

उस धरती के कण-कण से, चंदन तिलक लगाने आई हूँ।

यह देश मात्र नहीं रूस, है बहन बड़ी भारत की,

एक वीर बहन को उसका हाल बताने आई हूँ।

रूस वीर धरा को वंदन, मेरी वाणी का अभिनन्दन है।

भारत, रूस दोनों की माटी का कण-कण चन्दन है।

दोनों के इतिहास एक से बलिदानियों की गाथा हैं।

उस गाथा को रोम-रोम में पुनः जगाने आई हूँ।

रूसी धरती वीरों के पाक खून से रंगी हुई बलिदानों से ,

भरी युगों युगों से अटल खड़ी है। मैं यही बताने आई हूँ।।

वर्षारानी

अंशुल यादव
कक्षा -10

वर्षारानी आती हो तुम, तो घटा उमड़ती है काली।
मौसम ठंडा कर जाती हो, सब हँसते दे- दे ताली।।
चारों तरफ पानी भर जाता है, खेतों में दिखती हरियाली।
कुछ लोग परेशान हो जाते, जब रुकती घर की नाली।।
सूरज सुबह उदय जब होता, छा जाती उस पर लाली।
उसे देखकर मोहित होते, आती किरणों की जाली।।
वन उद्यान सब नये वस्त्रों में, वस्त्र उनके हरे हरे।
साधु बैठे रमा में धूनी, जय राम जय कृष्ण हरे।।
चिड़िया चु-चु करती फिरती, गाती होकर मतवाली।
वर्षारानी के स्वागत में, झुकती पेड़ की डाली।।
खेत और खलियान की छोड़ो, कहना क्या छत आँगन का।
राखी लेकर आती बहने, जब महीना आता सावन का।।
वर्षा अमर सदा तुम रहना, समय को पूरा रखना याद।
हाथ जोड़कर विनती मेरी, हम करते धन्यवाद ।

अनुशासन

रितिक राज

कक्षा- छह

अनुशासन हर एक इंसान का परीक्षण है,
अगर अनुशासन है, तो सब सक्षम हैं।
जो अनुशासन का पालन करे,
उसके लिए सब कुछ मुमकिन है,
और जो अनुशासन का पालन न करे,
उसके लिए सब नामुमकिन है।
अनुशासन ही संसार का नियम है,
अनुशासन पर ही पूरी दुनिया कायम है।
अनुशासन का पालन करना कड़वा होता है,
लेकिन अनुशासन का पालन करने के बाद मिलने वाला फल बहुत मीठा होता है।
अनुशासित विद्यार्थी बढ़ाते हैं देश का मान,
जो दिखाते हैं अनुशासनहीनता, नहीं पाते हैं कही भी सम्मान।

प्रदूषण

मेधा झा
कक्षा - १०

ये
घटा काली
छाई हर तरफ
दम हरदम मेरा -तेरा
घुटने लगा, घटने लगी जिंदगी
लगी पिघलने हिम पर जमीं बरफ

नदी
ना बची
बन गया नाला
दूषित हुआ सब पेयजल
रसायन-डायन कचरा जो बचा
भर भर, बिना डर इसमे डाला

धूल
जैसे शूल
कण -सी चुभन
माहि लगे चक्षु जलन
काल जाल में फंसा विनाश
कैसी हुई, हे मानव तुमसे भूल

जागो
निद्रा तोड़ो
आलस अविलंब छोड़ो
साथ प्रकृति नाता जोड़ो
कर रोपण पौधा कर्तव्य निभाओ
बन प्रहरी प्रयावरण जीवन फर्ज निभाओ

मेरी छोटी बहन

अभिनंदन पोद्दार

कक्षा - 8

मेरी छोटी बहन गौरी,
जैसे हो बंदूक से निकली गोली।
है वो बहुत ही नटखट,
करती है हर पल खटपट।
है वो बहुत ही चुलबुली,
घर में मचाती है खलबली।
सारा दिन खेल-कूद और गाना,

परीक्षा से पहले घबराना।
खत्म नहीं होती उसकी बदमाशी,
फिर भी उसे मिलती है शाबाशी।
उसने नादानी अब तक नहीं छोड़ी,
फिर भी सब से प्यारी है छोटी बहन गौरी।

कोरोना का कहर

अणर्व कुमार
कक्षा बारह

आए तुम कहाँ से?
किसी को भी नहीं पता,
जाओगे तुम जब
सबका होगा भला ।।

सबके घर बंद कर
तुम अकेले- अकेले घूम रहे हो,
यह तो बताओ, कहां का रास्ता ढूँढ रहें हो ?

आए-तो-आए अब जा भी नहीं रहे हो...
क्यूँ लाखों लोगों को ऊपर का रास्ता दिखा रहे हो?
ये कहाँ का न्याय है?
जहाँ हमसे प्यार करने वालो को ही
हमसे जुदा कर रहे हो ?

हे भगवान!! हमारे किस बुरे कर्म की सजा दे रहे हो!?
क्यूँ हमें जान देने पर मजबूर कर रहे हो?

आज हम मरे हुए हैं-
जीवित हैं, पर मरे हुए हैं
फिर भी अगर आयेंगे हम साथ
तो जरूर देंगे इस कोरोना
को मात

क्या लिखूं मैं कविता

गुनिशेट्टी सात्विका

कक्षा - 6

क्या मैं बादलों के प्रकाश के बारे में लिखूं

या

बदलते हुए हालात के बारे में लिखूं

इस कविता में मैं क्या लिखूं

मैं युद्ध के बारे में लिखूं

या

शांति के बारे में लिखूं

इस कविता में मैं क्या लिखूं

मन की इच्छा शांति

लेकिन क्या लिखूं मैं कविता

मैं अभी भी सोच रही हूँ ।

हमारी रेलगाड़ी

श्रेयांश यादव

कक्षा - 8

छुक-छुक करती रेल,
बिजली, कोयला और खाती तेल।
इंजन काला होता आगे, लाल डिब्बे पीछे सेभागे।
पैसेंजर हो या हो मेल, छुक छुक करती आतीरेल।
पटरी की करो देखभाल, छेड़ोगे आएगा काल,
यात्री भी हैं किसी के लाल, दुर्घटना घटतीहर साल।
इसे न समझो कोई खेल, छुक छुक करती आती रेल।
सीटी जब बजाती है, भागी सवारी आती है।
नियमों की ना मालूम मात्रा, बिना टिकट करतेजो यात्रा,
तुरंत दिखाती उनको जेल, छुक छुक करती जातीरेल।

प्रयास

यथार्थ बजाज

कक्षा - 7

जीवन में कभी,
मत होना निराश
धैर्य रखना संभाल कर |
करते रहना प्रयास
निरंतर प्रयास करने वाला
कभी
परेशानियों से नहीं डरता |
डर कर जो बैठ जाता
वह मंजिल पार नहीं करता
इसीलिए.....
जीवन में हो अगर
कुछ पाने की आस,
मत होना निराश
करते रहना प्रयास |

नेताजी सुभाषचंद्र बोस

वंश बचानी

कक्षा- दस

सुभाषचंद्र बोस जब युवा थे तो उनके घर के सामने एक भिखारिन रहती थी। वो रोज उसे देखते और उसकी दुर्दशा से चिंतित भी होते । मन में यही आता कि इसे कितना कष्ट सहना पड़ रहा है। मैं कितने आराम से जीवन बिता रहा हूं। मजे से पौष्टिक भोजन करता हूं। जबकि इसे दो वक्त की रोटी भी ठीक से नहीं मिल पा रही है। इसके अलावा इसे मौसमों के थपेड़े भी सहने पड़ते हैं। इसके पास तो कोई घर तक नहीं। यदि हमारे समाज में एक भी व्यक्ति ऐसा है कि जो अपनी जरूरतें पूरी नहीं कर सकता तो मुझे सुखी जीवन जीने का क्या अधिकार है। उन्होंने उसकी मदद करने का निश्चय किया। सुभाष के घर से कॉलेज तक जाने के लिए उन्हें पिता कुछ पैसे रोज दिया करते थे। सुभाष पैदल चले जाते और वो पैसे बचा लेते। ये बचे हुए पैसे वह बुढ़िया को देने लगे ताकि उसकी मदद की जा सके। ऐसे थे नेताजी सुभाष चंद्र बोस जिन्होंने आगे चलकर कहा था— 'तुम मुझे खून दो, मैं तुम्हें आजादी दूंगा'।
जय हिंद ।

हम सब स्कूल जाएंगे

रुद्र बेंद्रे
कक्षा- सातवीं.

बहुत दिनों के बाद दोस्तों से मिलना होगा .
कुछ गपशप कई अनकही बातें,
जो इतने दिनों से दिल में दबी थी,
आज दिल खोलकर कहेंगे ।
थोड़ी शिकायत, थोड़ी नाराजगी,
पर दोस्तों से मिलना होगा.
रिश्ते-नाते एक तरफ ,
जान से बढ़कर है यह दोस्त मेरे।
यहाँ विदेश में यह मेरे भाई-बहन हैं ,
यह मेरे रिश्तेदार हैं .
आज हम डिब्बा एक साथ खाएंगे ,
मीठे-मीठे पल महसूस करेंगे .
दो साल बाद दोस्त एक साथ ही होंगे ।
फुटबॉल चेस और बाकी सारे खेल,
ऑनलाइन नहीं हम सचमुच खेलेंगे।
मम्मी पापा की डांट से बच जाएंगे,
हम अध्यापक को देख सकेंगे ,
उनके मार्गदर्शन से सही राह पर चलेंगे ।
हम सचमुच स्कूल जाएंगे ,
कई सपनों के साथ ईश्वर को प्रणाम,
कि हमारी शिक्षा ऑनलाइन नहीं ,
स्कूल में ही हो ,
हाँ, हम सच में स्कूल जाएंगे ।

किसान

अरनव सिंह

कक्षा - 6

आराम और सुखों की पोटली को अंगारो में दे झोंका है
धरती माँ के आँचल को अपने पसीनो से सींच कर,
ना जाने कितनों के पेट को पोसा है ।
बात है उसी किसान की ,
जिसे धरती माँ ने अपने सीने के करीब,
ना जाने कई युगों से लगा रखा है
तपती दोपहरी और ठंड की कंकनाहट ने,
उसके शरीर को ना जाने कई बार भेदा है ।
पर दुनियामें आज भी ,
मक्का और साग ने कई दिलों को लूटा है,
आज मैंने माँ के समकक्ष उस किसान को ला रखा है,
क्योंकि माँ ने मुझमें एक बार जान फूँकी है ,
और उस किसान ने ताउम्र सुबह से शाम,
खाना परोस मुझमें ज़िदंगी सौंपी है ।

RUSSIAN

Интересные факты о Москве – городе с прекрасным наследием

**Фахима Актер,
11 класс**

Москва – крупнейший город и столица России. Город стоит на берегу Москвы-реки в центральной части России. Это один из самых больших и популярных городов Европы. Город может предложить больше, чем просто красивые виды. Вот несколько интересных фактов, которые знают даже не все москвичи:

1. Москва претендует на самое большое количество миллиардеров в мире, всего в городе около 84 миллиардеров.
2. Тело Ленина хранится в Мавзолее на Красной площади в Москве более 85 лет.
3. Только 2 процента населения России проживает в Москве, несмотря на то, что это самый большой город в России.
4. В Москве находится 200-тонный Царь-колокол, самый большой колокол в мире. Пока его строили, огонь повредил конструкцию, поддерживавшую гигантский колокол, и колокол сломался, но он до сих пор хранится в Москве вот уже около 87 лет.
5. Говорят, что посольство Туниса в Москве кишит призраками. История гласит, что в те времена начальник милиции похищал женщин с улицы Малой Никитской и расстреливал их. Считается, что там, где сейчас находится посольство Туниса, обитают призраки этих женщин.
6. В Москве есть семь небоскребов, которые выглядят одинаково и известны как «семь сестер».
7. Успенский собор — старейшее сохранившееся здание Москвы. Это поразительное архитектурное сооружение с 5 куполами из золотых шлемов с 4 полукруглыми фронтонами.
8. Здания московского ФБР когда-то были камерами пыток, дом на углу Большой Лубянки и Кузнецкого, где сейчас находятся здания Московского Федерального бюро расследований, имеет темное прошлое.
9. Исторические изображения «красных» стен Московского Кремля свидетельствуют о том, что они были белыми даже в конце XIX века.
10. Река Неглиная веками беспрепятственно протекала через российскую столицу, но досаждала местным жителям. В 1860-х годах реку пустили в подземный туннель, который следует по руслу реки и впадает в Москву. Люди надстроили старое русло реки и превратили его в улицу Неглинную.

Новый год – 2022

Праншу Пракаш
11 класс

Новый год празднуют во всем мире 1 января. Встречая его, люди начинают аплодировать в ночь на 31 декабря. Новый год празднуют с большим размахом и весельем во всем мире. По григорианскому и юлианскому календарям Новый год отмечается ежегодно 1 января.

В первый день Нового года люди много развлекаются до полуночи. В Новый год все надевают новую одежду и поздравляют друг друга. Многие виды программ также проводятся в школах по случаю Нового года. Различные фейерверки, танцевальные конкурсы, песенные конкурсы и т. д.

Во время Нового года рынок великолепен и повсюду украшен разноцветными огнями и другими декоративными предметами. В некоторых странах по случаю Нового года есть официальные выходные, поэтому люди отправляются на пикник.

Новый год приносит новые надежды; мы всегда должны быть счастливы в любой ситуации, будь она плохой или хорошей. В этот день все вспоминают важные события уходящего года и оценивают обстоятельства, в которых прошел весь год.

И чтобы восполнить недостатки этого года, люди дают обещания приложить все усилия, чтобы в предстоящем году их жизнь была более благоприятна.

Некоторые трудности русского языка

Анмол Гупта
8 класс

Русский язык иногда непонятен нам иностранцам, например:

1. Некоторые русские буквы пишутся как в английском, но произносятся по-другому. Например русская «В» произносится как английская «V», но в английском тоже есть «В», и эта буква обозначает другой звук. Ещё есть буквы «ъ» и «ь» – как произносятся? Непонятно!

2. Е и Ё. Не всегда русские люди пишут две точки в букве «Ё». Как понять где какая буква?

3. Мой друг позвонил и сказал, что он сел в автобус. А когда я спросил «Рядом с окном?», он ответил: «Я стою!». Как понять сидит или стоит?

4. Как понять какой предмет лежит и какой стоит? Мама меня попросила, чтобы я принёс стакан, который стоит на столе, и вилку, которая лежит на столе.

5. Один раз я слышал разговор мамы с её подругой, и она сказала: «Давай! Пока!» и бросила трубку. Я так и не понял, что же давать?

6. Ой! Вчера мама бежала в сторону кухни и сказала, что молоко побежало! Мама или молоко? Как это понять?

7. На рынке сказали, что хорошие грибы пошли – куда пошли? Долго думал я!

8. Вчера мне сказали, что интересная книга вышла для детей моего возраста – куда вышла? Думал я долго!

Поэтому я решил заниматься русским языком по-настоящему!

Вопросов у меня много!

Моя будущая профессия

Аарав Парин, 10 класс

Здравствуйте, меня зовут Аарав Парин. В настоящее время я учусь в 10 классе в городе Москве.

Существует множество различных профессий, и каждому человеку необходимо выбрать занятие, в котором он сможет лучше всего развить свой талант и способности.

Когда я был ребенком в начальной школе, я очень мечтал стать космонавтом, который облетит всю вселенную и найдет инопланетян на других планетах, погуляет по Солнцу и отправится на край света.

Когда я вырос, мои идеи и мысли изменились. Теперь я хочу стать опытным врачом, потому что мне очень интересно изучать естественные науки, особенно химию и биологию. Я также хочу помогать людям оставаться в форме и быть здоровыми. Профессия врача поможет мне получить хорошие знания о моей физической форме и диете, а также о здоровье членов моей семьи.

Чтобы оставаться прогрессивным врачом, я также хотел бы быть социально влиятельным лицом, которое будет распространять знания среди миллионов людей в Интернете и помогать им поддерживать себя в хорошей физической форме и умственном здоровье.

На данный момент кажется, что говорить об этом легко, но реальный путь к успеху, должно быть, очень трудный. Но прежде всего я хочу стать хорошим человеком в жизни, который поможет своему обществу стать лучше. Надеюсь, мое будущее будет похоже на то, о чем я мечтаю.

Зима в Москве

Рудра Бендре
7 класс

Я переехал из Мумбаи в 2018 году. Зимой в Мумбаи 20 градусов тепла, минимальная температура 15 градусов. Поэтому когда я поехал в Москву, это был совершенно другой опыт. Было холодно. Снег, падающий с неба, был похож на мягкие ватные шарики. Все было белым, как белая пустыня.

Зимний город красиво освещен. Темнеет уже в 3:00 дня. Вся Москва кажется сказкой. Прекрасные карусели, украшенные шарами, уличные фонари, люстры украшают город. Кремль, парк Победы и парк Горького оформлены волшебным образом. Люди из далеких и близких мест приезжают в Кремль. Катание на коньках очень популярно в Москве. Это мое любимое занятие! Я люблю играть на снегу. Я беру своего кота Льва, и мы вместе гуляем и наслаждаемся мягким снегом. Это совершенно новый для меня опыт – играть на снегу. Лучшее зрелище — увидеть уборку снега большими транспортными средствами, которые круглосуточно работают, чтобы убрать снег!

Спорт

Прашанна Аматыя

7 класс

Спорт – это активность, в которой мы используем свои умственные и физические силы. Мы можем заниматься спортом индивидуально или играя в команде. Спорт также дает нам много преимуществ: помогает нашему телу стать стройнее, увеличивает рост, повышает концентрацию внимания. Спорт не только помогает развивать атлетизм, но и позволяет нам научиться быть лидером и командным игроком. Спорт помогает нам строить отношения и учит уважать всех.

Существуют разные виды спорта: баскетбол, футбол, хоккей, шахматы, волейбол, теннис, настольный теннис и многие другие. В России занимаются многими видами спорта, но все больше всего любят футбол и хоккей. Российские спортсмены завоевали множество медалей по фигурному катанию, хоккею, борьбе, дзюдо на международных турнирах. Национальный вид спорта России – хоккей.

Я тоже с детства занимаюсь спортом. Раньше я играл в футбол за школьную команду, а сейчас играю в баскетбол в команде «Спартанцы», в клубе «Стремление». Предлагаю каждому найти свой любимый вид спорта и тренироваться, чтобы оставаться в форме и быть здоровым!

Сардар Валлабхбай Пател

**Шах Жинеш Крунал,
7 класс**

Валабхбхай Пател родился в Надиаде 31 октября 1875г. Он был успешным адвокатом. Он был лидером Индийского национального конгресса, который сыграл ведущую роль в борьбе страны за независимость, направив ее интеграцию в единую независимую нацию. В Индии и других странах его часто называли Сардар, что в переводе с хинди означает "вождь". Пател убедил почти каждое княжество присоединиться к Индии. Его приверженность национальной интеграции в новой независимой стране была полной и бескомпромиссной, за что он получил прозвище «железный человек Индии», его также называют "Объединителем Индии". Статуя Единства, самая высокая статуя в мире, была посвящена ему 31 октября 2018 года и достигает приблизительно 182 метров в высоту.

Алексей Архипович Леонов

**Сакши,
5 класс**

Алексей Архипович Леонов родился в глухом селе Листвянка, на территории современной Иркутской области России. Алексей Архипович Леонов родился 30 мая 1934 года. Учился в Кременчугском лётном училище Национального авиационного университета. Алексей Архипович Леонов – советский и российские космонавт, писатель и художник. 18 марта 1965 года он стал первым человеком, совершившим выход в открытый космос, выйдя из капсулы во время полёта «Восход-2» на 12 минут и 9 секунд. Дважды Герой Советского Союза. Скончался 11 октября 2019 года (85 лет) в Москве.

L'IMPORTANCE DU SPORT

Pranav Rawat
Class X

Le sport est très important dans la vie. Il est important pour nos santés et pour développer nos personnalités. Le sport nous rend plus rapides et plus forts. Les sports et les jeux nous aident à aborder et à apprendre à surmonter les situations difficiles de la vie. Il développe l'habitude de travailler en équipe en développant un sentiment de convivialité entre les membres de l'équipe. Il supprime l'épuisement mental et nous rend plus capables de faire n'importe quel travail difficile. Un enfant peut être une personnalité sportive nationale ou internationale célèbre s'il pratique régulièrement le sport ou le jeu. Pour les bons sportifs à l'école ou au niveau collégial, les sports et les jeux sont une belle option de carrière pour eux à l'avenir. Outre la connaissance des livres, le sport et les jeux sont également très importants. Les sports et les jeux comme le cricket, le football, le tennis et le badminton, etc. ont de nombreux avantages pour l'esprit et le corps.

Le Sport

Anshika Singh

Class 10

J'aime le sport. Il est utile pour ma santé. Les jeux et les sports améliorent les capacités de constitution d'équipe et nécessitent une réflexion rapide. En faisant du sport, je développe ma personnalité. Je deviens plus habile et rapide. Il existe deux types d'activités sportives - intérieures et extérieures. Certains sports d'aventure peuvent également être répertoriés. Ceux-ci incluent la plongée sous-marine et l'alpinisme. Il y a aussi quelques inconvénients du sport. Ils peuvent être dangereux. Des sports comme la natation, le football et le cricket peuvent être dangereux et fatigants pour le corps. Cela peut être épuisant. Moi, je préfère jouer au badminton, au ping-pong et aux échecs. Je pense que le football, le volleyball, le basketball donnent l'esprit d'équipe. Autant qu'elles sont divertissantes, les activités sportives et physiques sont également essentielles pour maintenir un corps en forme et en bonne santé. Quand je pratique le sport, je communique avec mes amis. Je vais souvent en famille au stade. Aussi, les activités sportives m'apprennent à être responsable de mes actions. On devra tous faire du sport.

LA CUISINE FRANÇAISE

Kibria Orthi

Class IX

La cuisine française se compose des traditions et des pratiques culinaires de la France. Sa cuisine a été influencée au cours des siècles par les nombreuses cultures environnantes d'Espagne, d'Italie, de Suisse, d'Allemagne et de Belgique. Au 14ème siècle, Guillaume Tirel, un chef de cour connu sous le nom de « Taillevent » a écrit « Le Viandier », l'un des premiers recueils de recettes de la France médiévale. Le fromage et le vin font partie intégrante de la cuisine. La connaissance de la cuisine française a contribué de manière significative aux cuisines occidentales. Ses critères sont largement utilisés dans les commissions scolaires de cuisine occidentale et dans l'enseignement culinaire.

PARIS (LA BIOGRAPHIE)

Anarghya Sharma

IX Class / Neuvième Classe

Paris (surnommé ville de la Lumière) est la capitale de la plus grande ville de France. Environ 2,15 millions de personnes y vivent. Si, les banlieues sont comptées. La population de la région parisienne s'élève à 12 millions d'habitants. La Seine traverse la partie la plus ancienne de Paris, et la divise en deux parties, connues sous le nom de gauche et de la rive droite. Elles sont entourées de nombreuses forêts. Paris est aussi le centre de l'économie, de la politique, de la circulation et de la culture française. Paris possède de nombreux musées d'art et monuments historiques. En tant que centre de trafic, Paris dispose d'un très bon métro. Il a également 2 aéroports. Le métro a été construit en 1900 et a une longueur totale de plus de 200 km. La ville a un style multiculturel. 100 des habitants de l'extérieur de la France. Il existe de nombreux restaurants différents avec toutes sortes de nourriture.

VOYAGER À PARIS

Stefania Kaushik
Class 9

Moi et mes parents nous avons voyagé à Paris en 2019. Ce fut un voyage merveilleux au début, nous avons fait un tour en bateau sur La Seine. C'était très beau, ces navires sont arrêtés près de chaque monument. Par exemple, le musée du Louvre, la Tour Eiffel, la Basilique de Sacre-Coeur et beaucoup plus. C'était très beau. Puis nous avons visité le château de Versailles. C'est un immense palais. Il y a avait beaucoup de chambres. C'était incroyablement beau. Après, nous avons visité les Champs-Élysées. Le soir, quand les lumières sont allumées dans toute la rue, c'est très spectaculaire. Paris est très beau le soir comme le jour. le lendemain, nous avons visité le musée du Louvre : il y a avait beaucoup de belles peintures et sculptures. J'ai vu une superbe peinture de Joconda tout était très magnifique. J'aime beaucoup Paris!

Le repas français

*By Saanvi Parin
Class VI*

Je voudrais vous parler du repas français.

Les français mangent quatre repas—quatre fois par jour.

Le matin les français prennent le petit déjeuner.

Au petit déjeuner, les français mangent des tartines avec du beurre ou de la confiture.

Les jeunes prennent des cereales et des fruits.

Ils boivent du lait ou du jus de fruits.

Après le petit déjeuner les français prennent le déjeuner.

Au déjeuner, beaucoup de français sont au bureau.

Les français mangent à la maison ou à la cafétéria de l'école.

Ils mangent un repas complet.

Ils prennent souvent un dessert.

Les adultes boivent du café ou du thé.

Les jeunes prennent du pain au chocolat, des biscuits, du lait, des barres de chocolat ou des fruits on l'appelle le goûter.

Avant d'aller au lit les français prennent le dîner.

Au dîner, toute la famille est à la maison.

Ils prennent de la soupe, de la viande, des légumes, du poisson, du pain, des baguettes, du fromage et souvent du dessert.

Les adultes boivent souvent du vin aux repas.

Les fromages français sont le camembert etc...

Mes oiseaux

*Ismat Akter
Class 6*

Bonjour, aujourd'hui je vais présenter mes oiseaux.

J'ai 2 oiseaux.

Ils s'appellent Kiwi et Pikachu,

nous les avons achetés, le 27 février.

Leur nom de race est perroquet.

Les perroquets sont des oiseaux à longue queue.

Kiwi est une fille, Elle est de couleur jaune et verte.

Kiwi aime manger, Elle est très énergique

Pikachu est un garçon, il est aussi très énergique.

Ils habitent dans une cage noire

Dans la cage, il y a une petite maison et une balançoire

J'aime mes oiseaux.

CE QUE JE VEUX ÊTRE QUAND JE SERAI GRANDE.

Tanha Islam
Class 7

Bonjour, je m'appelle Tanha. J'étudie actuellement en classe 7. Je voudrais vous dire ce que je voudrais devenir quand je serai grande. Je n'ai pas encore étudié la chimie mais la première fois que j'ai vu la chimie, je suis tombé amoureux de la chimie. J'ai décidé que je consacrerai ma vie à la chimie. Je veux vraiment devenir chimiste. Mes parents n'ont jamais vraiment aimé mon idée, car il y a très peu d'emplois pour ceux qui étudient la chimie. Et la chimie est très difficile. Mais je suis prête à tout. J'espère vraiment devenir chimiste. Je souhaite que dieu exauce mon souhait. Eh bien, c'est tout ce que je souhaite. Je ferai de mon mieux. J'espère qu'un jour j'atteindrai mes rêves.

La tour Eiffel

*Yuvraj Kumar
Class 7*

La tour Eiffel est située dans la Paris. Paris est la capitale de la France. La tour mesure 330 mètres. La tour a été construite le 28 janvier 1887. 7 millions de visiteurs viennent voir la tour eiffel chaque année. Les architectes qui ont fait la tour Eiffel sont Stephen Sauvestre Emile Nouguier Maurice Koechlin. la tour eiffel porte le nom de Gustave Eiffel. La tour eiffel a été construite pour célébrer le centenaire de la révolution française. La tour Eiffel a 135 ans. Une partie de la tour eiffel a pris feu en 1956. Le premier étage de la tour eiffel abrite des expositions de musée, un sol en verre, des expositions temporaires, des boutiques de souvenirs et des restaurants. Le deuxième étage a plus de restaurants et de boutiques, le restaurant Jules Verne et une zone d'observation. La Tour Eiffel s'agrandit jusqu'à 15 cm pendant l'été, lorsque la température atteint 40°C.
